ECA MEDIA FILTER

Designed and 100% made in Australia, the ECA Sand Filter utilises the same high quality manufacturing process as AstralPool's larger filters to achieve sparkling clear pool and spa water.

FOR SMALL TO MEDIUM SIZED POOLS

For conventional above ground and small to medium size in-ground pools, the ECA Sand Filter is often the perfect choice for these applications.

HIGH QUALITY AND LONG LIFE

A high tooling and machinery investment combined with engineered shape and performance means the ECA Sand Filter is perfect for all pools up to 60,000 litres while turning over the pool water twice in an 8 hour daily filtration cycle.

LOW MAINTENANCE

Simple and easy installation means lower installation and maintenance costs. High quality components such as oil filled pressure gauge, corrosion free valve connections and fast draining of water and filter media for maintenance mean the ECA Sand Filter is not only economical to purchase but is economical and easy to maintain and service for the life of the product.
